KidSight Vision Screening

Healthy vision is key for a child's learning and development

One in four children have a vision problem

Your child might not complain about poor vision because it is "normal" to them

KidSight is coming to your child's center!

Our free vision screenings are fast and fun, just like taking a picture. Every family will be notified of their child's results. If your child is referred we will ask for your contact information. Please contact your child's teacher if you **DO NOT** want to participate in the screening.

Healthy vision is essential to your child's success in school.
